

Md Ashiqur Rahman

MERN Stack Developer | Frontend Developer | Backend Developer

Chhatak, Sunamganj, Bangladesh | web3.0.ashiq@gmail.com | +8801727504474 | [Linkedin](#) | [Github](#) | [Portfolio](#)

Objective

Highly motivated and detail-oriented aspiring MERN Stack Developer seeking an entry-level position to apply recently acquired skills in MongoDB, Express.js, React, Node.js, and Next.js. Eager to contribute to innovative web development projects in a dynamic organization, continuously learn new technologies, and support company growth.

Skills

- **Core Technologies:** JavaScript (ES6+), HTML5, CSS3
- **MERN Stack:** MongoDB, Express.js, React.js, Node.js
- **Frontend:** Next.js, Redux, Tailwind CSS, Bootstrap, Responsive Design
- **Backend:** REST API Design & Development
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Firebase, Netlify, Figma, Canva, Vercel
- **Familiar With:** WordPress, Basic Photoshop, MS Office

PROJECTS

BasaFinder (Smart Rental & Housing Solution) | [Live Link](#), [Github](#) (front-end), [Github](#) (back-end) .

Full-stack web application connecting landlords, tenants, and admin for rental property management. Features include role-based authentication (JWT, bcrypt), detailed listings with search/filter, rental requests with approval/payment integration, and custom dashboards. Built with Next.js, Tailwind CSS, TypeScript, Node.js, Express.js, and MongoDB.

Bike Shop Application | [Live Link](#), [Github](#) (front-end), [Github](#) (back-end) .

Developed a user-friendly e-commerce platform for a bike shop with secure, role-based (customer/admin) authentication (JWT, bcrypt). Implemented product management, responsive design, and ensured an error-free, visually appealing user experience. Built With React, Tailwind CSS, Redux Toolkit, TypeScript, Node.js, Express.js, and MongoDB

PluggedIn | Team Projects | [Live Link](#), [Github](#)

Web-based media recording and collaboration platform offering screen, webcam, and audio recording modes. Supports multiple user levels with features like media storage, text editor, media sharing, team chat, and file sharing. Led the team, managing the project and contributing to features like the text editor, media sharing, and backend development. Integrated Firebase Authentication (Email/Password, Google, GitHub) and utilized JavaScript, Next.js, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Firebase, and Socket.io.
